An icon. **Reborn.**

The new Golf has arrived. Sportier, more dynamic, and above all more digital than ever before. This new Golf comes with the latest multimedia and assistance systems and is ready for practically everything life throws your way – now and in the future.

Model shown is the new Golf Style in optional 'Lime Yellow' metallic paint with optional 18-inch 'Dallas' alloy wheels.

Exterior

The striking appearance of the new Golf effortlessly catches eyes. It conveys more confidence with sharper lines and a wider profile. But it's still a Golf. And thanks to the various equipment lines focused on design, function, and comfort, you are sure to find your own personal Golf.

Interior

The Golf interior features a host of innovative design elements. Most impressive is its fully digital cockpit with intuitive touch controls, background lighting and the optional head-up display, which is projected onto the windscreen.

01 Give your new Golf more personality. Light up the **interior** subtly with the option of 10 colours. Whether cooler or warmer, in the bright lights of the big city or down a dark country road: Create the appropriate atmosphere for you and your passengers on every trip. **OE**

02 The most important information in view while keeping your eyes on the road: this is the major advantage of the optional **head-up display** in your new Golf. The windscreen becomes a projection screen – displaying speed, driver assist messages and navigation instructions. The projection can be easily read, even when light is shining in your face. And you can switch it off at any time. **OE**

Model shown is the new Golf Style in optional 'Lime Yellow' metallic paint with Discover Pro navigation system.

Infotainment and connectivity

Whether making a call while driving, retrieving the latest traffic information or listening to your own playlists, the new Golf makes it all quite simple. The new voice control system lets you say what you would like to happen, and your new Golf takes it from there. It's also easy to integrate your mobile devices, like smartphones and tablets.

02

01 With optional voice control¹ you can choose to operate the radio, telephone, air conditioning system and navigation in your new Golf all by using spoken instructions. Use your voice to select the right station, address, or phone number. And with Online Voice Control from **We Connect Plus** your new Golf will understand you even better. For example, select your favourite music online or set your target destination in a completely intuitive way. Model shown is the new Golf R-Line. **OE**

02 With the **We Connect App** for your smartphone, you always have access to the most important data about your new Golf, no matter where you are. For example, you can check the remaining range or whether all doors and windows are closed. You can also easily program the optional auxiliary heater. **S**

¹ Voice control is also available for the optional Discover Pro navigation system.

² App-Connect includes Apple CarPlay™, Android Auto™ and MirrorLink® technologies. To avoid distraction, only certified apps can be started while driving. In this context, please also note that some apps are not available for each of the three technologies and the availability of these technologies may vary depending on the country. You can find information on the compatibility of smartphones at www.volkswagen.de/mobiltelefon and also for Apple CarPlay™ at <https://www.apple.com/de/ios/carplay/>, for Android Auto™ at https://www.android.com/intl/de_de/auto/ and for MirrorLink® at <https://mirrorlink.com/>.

Some of the illustrations on these pages present R-Line equipment.

Standard equipment **S** Optional equipment **OE**

03 Play a different song? Change system settings? Intensify the lighting? No problem! Operate the optional **Discover Pro navigation system** intuitively and comfortably either by voice or touch. It impresses with its 25.4-cm (10-inch) screen, eight speakers, DAB+ digital reception and Bluetooth mobile telephone interface. Whatever you need. **OE**

04 Using apps and content comfortably, that's what App-Connect stands for. Music, news, maps or audio books are transferred to the display of the infotainment system and can therefore be operated in your field of vision. Three interfaces for connecting smartphones are possible: Apple CarPlay™, Android Auto™ from Google and MirrorLink®. Wireless App-Connect makes the use of Apple CarPlay™ through the wireless connection option possible for the "Discover Media" and "Discover Pro" navigation systems².

Model shown is the new Golf Style in optional 'Lime Yellow' metallic paint with optional 18-inch 'Dallas' alloy wheels.

Standard equipment  Optional equipment 

Personalisation

In the new Golf, you can not only adjust the background lighting to your preference, but also the style of the display in the cockpit. Customised and intuitive. The new Golf also stores up to 14 driver profiles and adjusts to the driver as soon as they sit behind the wheel.

01 Set the new Golf to your own personal preferences: Sitting position, temperature, lighting, music volume, navigation and assist systems – once installed, the **personalised** profile is stored and activated as soon as you enter the vehicle. This is especially practical when several different people use the new Golf and need to make their own adjustments. It is then unnecessary to readjust the settings every time you use the vehicle. The system does the work for you. **OE**

02 No time wasted looking for your misplaced keys – your smartphone is your **mobile key**¹ that instantly opens and starts your new Golf. You can also share extra digital keys with your friends and family members, to enable them to easily use your vehicle. **OE**

¹ Only available with the optional Discover Pro navigation system, and in conjunction with the We Connect app. Initially, there are two mobile keys that can be redeemed within the first 4 years of completion of the We Connect contract. Passing on a mobile key requires an identity check on the person sending the key, using the Volkswagen Ident procedure. After installation on a compatible smartphone, the mobile key has a validity of one year, and is tied to the end device. A smartphone with a suitable iOS or Android operating system and SIM card with data option with a mobile data contract already in existence or to be agreed separately between you and your mobile data provider is required to use the free We Connect app. A smartphone compatibility overview can be found at www.connect.volkswagen-we.com. For information on mobile data charges, please consult your mobile data provider.

IQ.DRIVE Driver Assistance

Trusty assistants can make life a little easier. Even driving. At Volkswagen, IQ.DRIVE stands for all our intelligent driver assist systems – all those that already exist in our company today; that we are developing for tomorrow; or that we are researching for the future. IQ.DRIVE is also synonymous with innovative ideas that have a clear focus: your comfort and safety.

01 Vehicles that communicate with each other while driving can make the roads safer, make for less congestion, and warn of dangerous local conditions. The standard-equipped **traffic hazard alert** supports the driver with useful information, such as warnings about roadwork or emergency vehicles.¹ The communication is handled by wireless Car2X technology (pWLAN). **OE**

02 At the touch of a button, the optional **Travel Assist**² provides a great degree of extra driving comfort¹ by offering support during monotonous or tiring conditions: particularly on the motorway and major country roads, Travel Assist can maintain the lane and speed, as well as the distance from traffic ahead. In combination with the DSG dual clutch gearbox, you can also handle congested roads and stop-and-start traffic in a relaxed way. **OE**

03 The ACC Adaptive Cruise Control helps you to maintain a set maximum speed³ and a user-defined distance to the vehicle in front. In combination with an optional navigation system, the ACC is equipped with predictive cruise control and cornering assistance. This will help you to avoid speeding violations by adopting official speed limits.¹ The system also adjusts its own vehicle speed in corners, crossings (turns) and roundabouts using route data from the navigation system.¹

S

04 The optional IQ.LIGHT matrix LED headlights with Dynamic Light Assist illuminates the way more brightly and further ahead. Thanks to matrix technology, individual LED segments can be specifically turned on or off. The advantage here is that when driving with the main beams on, oncoming vehicles and those ahead can be detected by a camera. Specific LED segments are turned off so that it is possible to drive with the main beam headlights on continuously but without dazzling other road users. **OE**

¹ Within the system limits. The driver must be prepared at all times to override the assist systems.

They are not released from their responsibility to drive with the utmost care.

² Will be introduced at a later date.

³ Up to max. 210 km/h.

Upholstery

- 01 **Fabric Quad Paper Soul BD.** Standard on Golf and Comfort
- 02 **Fabric Maze Soul BD.** Standard on Life

The all-new Golf

Edition: March 2020

To use We Connect services, the customer needs a Volkswagen ID user account, and must log into We Connect with their username and password. In addition, a separate We Connect or We Connect Plus contract must be concluded on-line with Volkswagen AG.

The vehicles shown in this catalogue may be fitted with optional equipment. All the information regarding equipment and technical data is based on the characteristics of the German market and corresponds to the knowledge available at the time of printing. Your local Volkswagen Dealer will be happy to provide you with details on the products available in your country. Subject to change without notice. DSG®, 4MOTION®, BlueMotion® and TSI® are registered marks of Volkswagen AG and other companies in the Volkswagen Group in Germany and in other countries. The fact that a mark is not shown with an ® sign in this document cannot be interpreted as meaning that this mark is not a registered mark and/or that this mark can be used without prior approval in writing from Volkswagen AG. Volkswagen provides for the return and recycling of end-of-life vehicles. All Volkswagen vehicles can, therefore, be recycled and, subject to fulfilment of legal prerequisites, can be returned free of charge. Further information is available from your Volkswagen Dealer, on the Internet at www.volkswagen.com or in the Federal Republic of Germany via the free-call telephone number 0800 – VOLKSWAGEN (0800 – 86 55 79 24 36).

Fuel consumption in l/100 km: 6.3–4.2 (combined); CO₂ emissions in g/km: 142–110 (combined), efficiency classes: B–A+. The specified consumption and emissions values were obtained using the legally required measurement procedure. Since 01 Sept 2017, certain new vehicles have been type-approved according to the Worldwide Harmonised Light Vehicle Test Procedure (WLTP), a new, more realistic testing process for measuring fuel consumption and CO₂ emissions. The WLTP will gradually replace the New European Driving Cycle (NEDC) from 01 Sept 2018. Due to the more realistic testing conditions, the fuel consumption and CO₂ emissions values measured according to the WLTP are often higher than those measured under the NEDC. This may result in corresponding changes to vehicle taxation from 01 Sept 2018. Further information about the differences between the WLTP and NEDC is available at www.volkswagen.de/wltp. It is currently still mandatory to include NEDC values in communications. For new vehicles that have been type-approved according to the WLTP, NEDC values will be derived based on WLTP values. The additional provision of WLTP values is voluntary until their application becomes mandatory. If NEDC values are specified as a range, they are not based on any individual vehicle and do not form part of the offer. They are provided purely for comparison purposes between the various types of vehicle. Additional equipment and accessories (attachments, tyre format, etc.) can change relevant vehicle parameters, such as weight, rolling resistance and aerodynamics. As well as weather and traffic conditions and personal driving style, these add-ons could also affect a vehicle's fuel consumption, power consumption, CO₂ emissions and performance. Further information regarding official fuel consumption and the official, specific CO₂ emissions for new passenger vehicles is provided in the publication "Guidelines on fuel consumption, CO₂ emissions and electricity consumption of new cars", which is available free of charge from all points of sale and DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Straße 1, 73760 Ostfildern/Scharnhausen, Germany (www.dat.de/co2).
