An exterior that's extraordinary

The new Tiguan shows you what constant reinvention means, not least in its advanced design. From the power-focused proportions of its dynamic front and precise lines that run over the pronounced shoulders, all the way to the distinctive rear, this automobile has an expressive silhouette that highlights its strengths: the power of innovation, authority, and uncompromising functionality.

01 From the first time it catches your eye, the new Tiguan radiates authority. Bold design elements such as the redesigned radiator grille emphasise its strengths and create a striking identity for this stylish adventurer.

IQ.LIGHT

The Tiguan beams with brilliance; so do its LED tail light clusters and IQ.LIGHT LED matrix headlights. In the Tiguan Elegance (Standard) and Tiguan R-Line (optional), these are even equipped with cornering light, and when purchasing in a package with the new tail light clusters are supplemented with dynamic main-beam control: this makes it possible for individual LED segments to be switched on or off on a targeted basis to adjust light patterns to suit the driving situation. So you can enjoy a relaxed drive, and so can anyone driving ahead of you or coming toward you. Another spectacular feature is the integrated dynamic turn signal, that indicates the direction by means of a flowing movement of light.

An interior that's innovative

The generous interior of the new Tiguan is a space for forward thinkers. The driver-focused cockpit is designed to feature intuitive controls that make it easy for you to concentrate on what really matters. There's the multifunction steering wheel in leather for example, or the Digital Cockpit with a 26 cm (10.25-inch) TFT colour display that comes as standard in the Tiguan Elegance and Tiguan R-Line.

IQ.DRIVE

Driver assist systems

Trusty assistants make life a little easier; when driving too.

At Volkswagen, IQ.DRIVE stands for all our intelligent driver assist systems – all those that already exist in our company today; that we are developing for tomorrow; and that we are researching for the future. IQ.DRIVE is also synonymous with innovative ideas that have one clear focus: your comfort.

01 The **proactive occupant protection system** can keep you safe you in critical situations, such as if a collision is imminent. It can identify situations where there is a high risk of an accident, and responds by automatically closing the windows and tilting and sliding panoramic sunroof, and tensioning the front seat belts as a precaution. It's good to know that this feature is in place – though it's better if you never experience it yourself.¹ Standard **EL R** Life **OE**

02 **Emergency Assist**, which is available on request, can intervene in the event of a medical emergency; if it registers that driver activity has stopped, it will attempt to alert the driver.² If there is still no response, the system stops the vehicle in a controlled manner, within system limits, and in doing so can prevent an accident.^{1,2} Standard **R** Elegance **OE**

03 The new Tiguan puts technologies on the road that will make your journey more relaxed. This also includes optional **Travel Assist**. At the touch of a button, this function provides a high degree of driving comfort by supporting you during monotonous or tiring driving situations. On the motorway and major provincial roads in particular, Travel Assist can keep you in lane and maintain speed, as well as staying the right distance from traffic ahead. When used in combination with the dual clutch gearbox (DSG), it means you can even tackle congested roads and stop-and-start traffic with little stress.^{1,3} **OE** Standard **R**

04 Thanks to **Front Assist** Autonomous Emergency Braking with Pedestrian Monitoring, if a collision is imminent your Tiguan can help to reduce the severity of the collision – or ideally, avoid the collision entirely. It does this by monitoring the road ahead and, if it detects pedestrians and vehicles there, it warns the driver in plenty of time. If the driver fails to respond, the system can apply the emergency brake.¹ Standard **LF EL R**

¹ Within system limits.

² Available in combination with optional Travel Assist.

³ The driver must be prepared to override the assistance system at any time, and is not relieved of their responsibility to drive the vehicle with due care.

Infotainment and connectivity

The new Tiguan is your gateway into the digital services offered by Volkswagen. Fully connected from the outset on request, after you have completed a one-off activation and signed in with your Volkswagen ID, many **We Connect services** will be available for you to use. The **We Connect app** enables access to important vehicle information. You can also check remotely whether the doors of your Tiguan are locked or the side light is switched off, for example.

01 With the integrated **Wi-Fi hotspot¹**, your Tiguan is ready to take the data highway. The stable internet connection it creates enables you and your passengers to browse on up to eight devices, ensuring everyone can be entertained. It uses practical data bundles purchased through the Infotainment system, meaning you can keep track of the volume of data used. **S**

02 With navigation services from **We Connect Plus¹**, you'll have access to current traffic information in real time. Online Route Calculation means you can be sure you are on the best possible route, while Online Map Update always gives you access to the latest map data. Media Streaming and Internet Radio bring further smart entertainment options to your Infotainment system, so you can enjoy your favourite music, live stations, and podcasts wherever you are. **S**

¹ To use We Connect services, you need a Volkswagen ID user account, and must log into We Connect with your username and password. In addition, a separate We Connect or We Connect Plus contract must be concluded online with Volkswagen AG. For We Connect Plus, you have 90 days from the handover of the vehicle to register the vehicle at portal.volkswagen-we.com, and you can use the services for the full duration of the agreed free period.

*Additional information about mobile online services from We Connect can be found on the back page.

*The use of mobile online services from We Connect is made possible by an integrated internet connection. Where network coverage is available, the data costs incurred in this context within Europe are borne by Volkswagen AG, with the exception of Streaming & Internet services. To use the Streaming & Internet services and the Wi-Fi hotspot, data bundles can be bought via an external mobile communications partner, Cubic Telecom, and used within many European countries where network coverage exists. Information on prices and supported countries is available at vw.cubictelcom.com. Alternatively, it is possible to use internet radio and media streaming via a mobile end device (for example a smartphone) that is enabled to function as a mobile Wi-Fi hotspot. In this case, the corresponding services are available only in conjunction with an existing or separately concluded mobile contract between you and your mobile provider, and only where coverage by the corresponding mobile network is available. Depending on your mobile phone tariff, receiving data from the internet may incur additional charges, particularly if you are using the phone abroad (e.g. roaming charges). To be able to use the free We Connect app, you need a smartphone with a suitable iOS or Android operating system and a SIM card with data option and which has an existing mobile phone contract between you and your mobile phone provider, or a contract concluded separately for this purpose. The availability of the individual We Connect and We Connect Plus services described in the packages may vary from country to country. The services are available during the agreed contractual period and may be subject to amendments or ceased throughout the duration of the contract. For more information, visit connect.volkswagen-we.com or contact your Volkswagen Dealer. For information regarding your mobile phone tariff, please contact your network provider.

The specified consumption and emissions values were obtained using the legally required measurement procedure. Since 01/09/2017, certain new vehicles have been type-approved according to the Worldwide Harmonised Light Vehicle Test Procedure (WLTP), a new, more realistic testing process for measuring fuel consumption and CO₂ emissions. The WLTP will gradually replace the New European Driving Cycle (NEDC) from 01/09/2018. Due to the more realistic test conditions, in many cases the fuel consumption and CO₂ emissions values measured in accordance with the WLTP will be higher than those measured in accordance with the NEDC. This may result in corresponding changes to vehicle taxation from 01/09/2018. Further information about the differences between the WLTP and NEDC is available at volkswagen.de/wltp. It is currently still mandatory to include NEDC values in communications. For new vehicles that have been type-approved according to the WLTP, NEDC values will be derived based on WLTP values. The additional provision of WLTP values is voluntary until their application becomes mandatory. If NEDC values are specified as a range, they are not based on any individual vehicle and do not form part of the offer. They are provided purely for comparison purposes between the various types of vehicle. Additional equipment and accessories (attachments, tyre format, etc.) could change relevant vehicle parameters, such as weight, rolling resistance and aerodynamics. As well as weather and traffic conditions and personal driving style, these add-ons could also affect a vehicle's fuel consumption, power consumption, CO₂ emissions and performance. Further information regarding official fuel consumption and the official specific CO₂ emissions for new passenger vehicles can be found in "Guidelines on fuel consumption, CO₂ emissions and electricity consumption of new cars", which is available free of charge from all points of sale and DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen (dat.de/co2).

The vehicles shown in this brochure may be equipped with optional equipment at additional cost. All of the information regarding equipment and technical data is based on the characteristics of the German market and corresponds to the knowledge available at the time of printing. Your local Volkswagen Dealer will be happy to provide you with details on the products available in your country. Subject to change, errors excepted. DSG® and TSI® are registered marks of Volkswagen AG and other companies in the Volkswagen Group in Germany and in other countries. The fact that a mark is not shown with an ® sign in this document cannot be interpreted to mean that this mark is not a registered mark and/or that this mark can be used without prior approval in writing from Volkswagen AG. Volkswagen provides for the return and recycling of end-of-life vehicles. As such, all Volkswagen vehicles can be recycled and, subject to fulfilment of legal prerequisites, can be returned free of charge. Further information is available from your Volkswagen Dealer, on the internet at volkswagen.com or in the Federal Republic of Germany via the free-call telephone number 0800 - VOLKSWAGEN (0800 - 86 55 79 24 36).
